

16 October 2012

SA 002/12

Summary

- An Apprenticeship Mentor is available to support engineering and manufacturing apprentices
- Increase the participation and completion rate for your apprentices
- Consider it an insurance policy against the time and cost invested in your apprentice

S.A members, take advantage of this free program now

Apprenticeship Mentors

Do you currently employ engineering or manufacturing apprentices?

Through Commonwealth funding, the Australian Industry Group is able to establish a mentoring program for your apprentices.

The service includes:

- Induction and information kits
- Regular visits
- On call advice
- Assistance resolving issues
- A Communication Hub through Facebook.
- Training for Apprentice Supervisors (if requested)

Program Benefits

There are many long-term benefits associated with an Apprentice Mentoring Program.

- improving health and safety performance
- enhancing the progress of your apprentice
- increasing retention of apprentices
- assisting with the removal of barriers between supervisors and apprentices
- promoting a strong understanding of the industry and the learning process
- enhancing the establishment of employers desired behaviours
- promoting learning, career planning, job enrichment and career progression

Mentors can coach, guide, and support apprentices.

Contact your local Apprenticeship Mentor, Mark Carter Ph 08 8394 0041 / Mob 0448 852 707
